

Table S1. Student responses to statements assessed before (B) and after (A) the camp by both the control (C) and impact (I) groups. Scale is 1=strongly disagree to 5=strongly agree. For each question, four statistical tests are possible: CB vs. CA, IB vs. IA, CB vs. IB, and CA vs. IA. As only one of 20 tests was statistically significant at the 5% level (decline for CA vs. CB values shaded) we present here only the mean rankings, which may be taken as a nearly invariant description of the study sample. For these and all other tests, a t-test for difference between means was used.

Statement	Control- Before	Control- After	Impact- Before	Impact- After
My parents are interested in science	4.2	3.9	3.9	4.2
My closest friends enjoy studying science	3.5	3.6	3.8	3.4
Much of what is learned in science is useful in everyday life	4.3	4.3	4.3	4.0
I enjoy studying science	4.6	4.4	4.6	4.4
It is important to know some science in order to get a good job	4.7	4.0	4.4	4.4
