*Desert Research Institute, the research campus of the Nevada System of Higher Education, consists of three core research divisions, Atmospheric Sciences, Hydrologic Sciences, and Earth and Ecosystem Sciences. DRI supports 500 research faculty and staff and conducts \$48 million in environmental research each year. DRI's research answers critical questions about global climate change, water quality and availability, air quality and human health, sustainability of desert lands, life in extreme environments, our archaeological heritage, and more.*

*Our department invites applications from high-quality, motivated students seeking M.S., M.I.P. (Peace Corps), and Ph.D. degrees. Our graduates are trained in highly technical, interdisciplinary skills, with the ability to adapt these principles towards research and engineering projects which merge the human and natural environments. We are also beginning international searches for tenure track faculty to help lead our research and graduate programs in volcanology/remote sensing, geophysics and hydrogeology.*
