Unlimited Access to AGU's Award-Winning Books

AGU Advances Earth and Space Sciences

As the largest single organization dedicated to all of the geophysical sciences, the American Geophysical Union provides a dynamic forum for the geophysical community through top-ranked scientific journals, world-renowned meetings and conferences, news and political updates, and scientific and technical committees. AGU supports the individual efforts of its members and partners with organizations around the world to foster the advancement of Earth and space sciences and to cultivate communication among researchers, academics, students, policy makers, and the interested public for the sole purpose of promoting discovery to benefit humanity and ensuring a sustainable future.

Publish Your Book with AGU!

geopress, AGU's books imprint, is seeking proposals for edited and authored monographs in disciplines across the Earth and space sciences, including the history and pioneers of geophysics, such as firsthand accounts of significant events and compilations of previously unpublished significant documents. **geopress** also welcomes titles relevant to the needs of working scientists, volumes with broad appeal through applications of science, and volumes pertinent to seismic and other events in Earth's ever-evolving nature. Books highlighting the beauty of natural occurrences are also invited, as **geopress** seeks to publish books with high-quality photography.

For more information and to submit a proposal or manuscript visit geopress.agu.org

For over 85 years, AGU books have published exceptional research on the Earth and space sciences. Now, the majority of these are accessible as **Digital Books**. Providing a rich historical foundation for current work across the geosciences, a subscription to the **AGU Digital Books Library** includes all books published through 2008.

New books from AGU's imprint **geopress** are also available through the **AGU Digital Books Current Collection**. This online subscription includes books from 2009 through the current year.

Institutions with standing orders SAVE 20% off each new print publication.

ABOUT GEOPRESS

geopress, the new imprint for AGU books, brings renewed enthusiasm to that portion of the Union's publishing program. For more than 85 years, AGU books have provided access to the work of scientists worldwide. Looking to the future, the new imprint leads the way for AGU to publish increasing numbers of single-author and multiauthor scientific works. Titles that are relevant to the professional needs of working scientists will be sought to round out the program's appeal and usefulness to AGU members and to the larger Earth and space science community.
