

## **AGU Digital Library Update**

Institutional subscriptions to the AGU Digital Library include online access to all AGU journals back issues from volume 1, issue 1 through 2003 material.

Eos back volumes (from volume 1 through 2003) are part of the subscription. Current issues of Eos (from 2004 and after) are not available for online access for institutions.

The online back issues of Eos are currently not available. The magnitude of the transforming Eos back issues into an online product, including the preparation for optimal search functions and reference linking, is taking longer than anticipated as AGU does not want to jeopardize the quality and functionality of the final product by rushing the process. AGU regrets the inconvenience this delay is causing and expects that the Eos online back issues will be available during 2009.
