

## Instructions on How to Add Line Numbering

To assist reviewers, please add line numbering to your manuscript. Instructions for the three acceptable formats are given below.

### For **Microsoft Word**

- Click on File, Page Setup.
- Click on Layout tab.
- Click on Line Numbers
- Enable Add Line Numbering check box
- Click Continuous
- Click on OK twice

### For **WordPerfect**

- Click on Format, Line, Numbering
- Enable Turn line numbering on check box.
- Disable Restart numbering on each page
- Click on OK

### For **LaTeX**

For agu2001.cls and aguplus.cls use the {} command.  
So, under the `\documentclass[12pt,agums]{aguplus}` or  
`\documentclass[wrr,draft]{agu2001}`, type the following:

```
\usepackage{lineno}  
\linenumbers*[1]
```

For agums.sty, add the style file to the options within the brackets and add the line numbering command below:

```
\documentstyle[12pt,lineno,agums]{article}  
\linenumbers*[1]
```

To add line numbers to lines with equations, the following coding must be added just before the `\begin{equation}` code:

```
\begin{linenomath*}
```

and add the following code after the `\end{equation}` on the same line

```
\end{linenomath*}
```
