

AGU Ranks Among Best in Earth and Space Sciences

As the largest single organization dedicated to all of the geophysical sciences, the American Geophysical Union provides a dynamic forum for the geophysical community through top-ranked scientific journals, world-renowned meetings and conferences, news and political updates, and scientific and technical committees. AGU journals are ranked among the top 10 most highly cited research publications on climate change, allowing AGU to outperform larger competitors. AGU supports the individual efforts of its members and partners with organizations around the world to foster the advancement of Earth and space sciences and to cultivate communication among researchers, academics, students, policy makers, and the interested public for the sole purpose of promoting discovery to benefit humanity and ensuring a sustainable future.

Publishing at AGU is Fast, Easy, and Affordable

- Simplified fees with no charge for color
- Web-based submission—AGU offers the real-time, easy to use, Geophysical Electronic Manuscript Submission (GEMS) system
- Wide audience—AGU articles are read in more than 148 countries and in over 2200 institutions
- Papers in Press—Available to subscribers within days of acceptance, with DOIs for immediate citation
- Available in print and online, *Water Resources Research* offers PDF and HTML formats, e-alerts, and high resolution figures in its online format
- Abstracts available through A&I services and on the journal Web site

The second most cited journal in Limnology,* *Water Resources Research* is an interdisciplinary journal for research in the social and natural sciences of water. It contains original contributions in hydrology; the physical, chemical, and biological sciences; and the social and policy sciences, including economics, systems analysis, sociology, and law.

WRR Quenches Interest

- Ranked the second most cited journal in Limnology, the third most cited in *Water Resources*, and in the top 20% of all Environmental Science Journals*
- High in demand, submissions have increased 33% since 2001
- Citations for *Water Resources Research* increased over 84% since 2002*
- *Water Resources Research* recorded 176,962 full-text COUNTER-compliant article downloads in 2010
- *Water Resources Research* ISI Impact Factor has risen 78% since 2004*
- A current online subscription to *Water Resources Research* offers published research from 1996 through the current year, while previously published articles are available through the AGU digital library
- New content is published online nearly every day
