

## CONTENTS

### **Preface**

*Thomas J. Ahrens*   vii

### **Crystallographic Data for Minerals (2-1)**

*Joseph R. Smyth and Tamsin C. McCormick*   1

### **Thermodynamic Properties of Minerals (2-2)**

*Alexandra Navrotsky*   18

### **Thermal Expansion (2-4)**

*Yingwei Fei*   29

### **Elasticity of Minerals, Glasses, and Melts (2-5)**

*Jay D. Bass*   45

### **Elastic Constants of Mantle Minerals at High Temperature (2-5a)**

*Orson L. Anderson and Donald G. Isaak*   64

### **Static Compression Measurements of Equations of State (2-6a)**

*Elise Knittle*   98

### **Shock Wave Data for Minerals (2-6b)**

*Thomas J. Ahrens and Mary L. Johnson*   143

### **Electrical Properties of Minerals and Melts (2-8)**

*James A. Tyburczy and Diana K. Fislser*   185

### **Viscosity and Anelasticity of Melts (2-9)**

*Donald B. Dingwell*   209

### **Viscosity of the Outer Core (2-9a)**

*R. A. Secco*   218

### **Models of Mantle Viscosity (2-9b)**

*Scott D. King*   227

### **Plastic Rheology of Crystals (2-10)**

*J. P. Poirier*   237

### **Phase Diagrams of Earth-Forming Minerals (2-11)**

*Dean C. Presnall*   248

## CONTENTS

**Diffusion Data for Silicate Minerals, Glasses, and Liquids (2-12)**

*John B. Brady* 269

**Infrared, Raman, and Optical Spectroscopy of Earth Materials (2-13)**

*Q. Williams* 291

**Nuclear Magnetic Resonance Spectroscopy of Silicates and Oxides in  
Geochemistry and Geophysics (2-14)**

*Jonathan F. Stebbins* 303

**Mössbauer Spectroscopy of Minerals (2-15)**

*Catherine McCammon* 332

**Index** 349
