**Editor search for JGR: Biogeosciences**

*JGR: Biogeosciences* is searching for an editor with expertise that complements areas already covered by existing Editorial Board members. Desired areas of expertise may include land-atmosphere exchange, terrestrial ecosystem modeling and carbon cycling, soil biogeochemistry, isotope biogeochemistry, ecophysiology, geomicrobiology, microbial ecology, and/or remote sensing development and applications in the biogeosciences. AGU editors work closely with the editor-in-chief to manage submissions and render decisions based on the recommendation provided by associate editors.

At *JGR: Biogeosciences*, editors decide whether submitted papers meet the criteria for scientific excellence and relevance for the journal. They do so by managing the peer-review process, assessing the quality and novelty of the science presented and by identifying and soliciting thought-provoking papers. Editors make decisions on the submissions based on their own reading, reviews, and associate editor recommendations. Editors assure that all submitted manuscripts receive prompt, equitable, critical evaluation, and meet timeliness goals.

Editorships are appointed by the journal's editor-in-chief for four-year terms and are provided an honorarium and a budget to cover editorial expenses. Editorial support is provided at AGU headquarters. The position begins January 1, 2023 for a 4-year term.

The *Journal of Geophysical Research-Biogeosciences* focuses on the interactions between biology, hydrology, geology, chemistry, and physics within the Earth system. Biogeosciences explores the interface between life science and Earth system science, as well as biogeochemistry, geobiology, and biogeophysics processes across multiple spatial and temporal scales. Biogeosciences research relies on various tools including theoretical, experimental, and field-based studies, models, and data synthesis. The journal receives 500 submissions annually which are divided equally among the editor-in-chief and 2 editors. JGR: Biogeosciences is committed to supporting diversity, equity, and inclusion in the publication process ([https://agupubs.onlinelibrary.wiley.com/doi/full/10.1029/2022JG006791](https://agupubs.onlinelibrary.wiley.com/doi/full/10.1029/2022JG006791)). Underrepresented minorities are especially encouraged to apply.

For consideration, please send your curriculum vitae with a letter of interest describing how your interdisciplinary expertise complements that of existing editors via email to: pubmatters@agu.org. In your letter, please highlight your publishing, reviewing, and editing experience. Please make sure to specify *JGR: Biogeosciences* in the subject line of the email.

**Deadline for applications is July 31, 2022.**
