Registration and Housing Now Open for AGU25

Earth and space scientists from around the globe will come together 15-19 December in New Orleans, LA to connect, collaborate, and inspire one another. Across our global scientific community, we are connected in support, collaboration and partnership. Never have those bonds been more important. Join us at AGU25: Where Science Connects Us.

[Register by 6 November](#) to take advantage of early bird rates. [Book housing by 11 November.](#)

New for this year, AGU25 Local Hubs offer a flexible way to participate in the Annual Meeting without traveling to the main event. Recognizing that many attendees are unable or choosing not to travel, Local Hubs provide an opportunity for groups to gather in their own regions, access AGU25 programming, and register at a special rate. Learn more about pricing, process details, and how to host a Local Hub.

Members of Congress are back in their home districts this month, making it the perfect time to flood the phones in support of science. When legislators return to Washington in September, they'll finalize Fiscal Year 2026 appropriations that set funding for NSF, NOAA, NASA, USGS, EPA and more. Use our pre-written phone scripts to easily reach your Senators and Representatives. [Call today!](#)

ACT

Faculty at under-resourced U.S. institutions — including MSIs, ERIs and community colleges — are invited to apply for a \$1,700 travel grant to attend AGU25. Recipients will join professional development and networking events designed to grow leadership skills and foster a more inclusive Earth and space sciences community. Apply by 3 September.

APPLY

Session and town hall proposals are open! The Astrobiology Science Conference 2026 will bring together scientists, educators and thought leaders from around the world to explore the most compelling questions about life in the universe. Whether your research focuses on biosignatures, planetary habitability, returned samples, or science engagement, we want to hear from you. Submit a proposal by 17 September.

Sign on to Defend EPA Peer-Reviewed Climate Science

In July 2025, the Trump administration proposed to overturn the U.S. EPA's

endangerment finding — a cornerstone of climate protection that recognizes greenhouse gases as a danger to public health and welfare. If you are a scientist with expertise in climate science or its impacts, please add your name to AGU's letter affirming the science. Sign by 12 September.
